Wireless Charging Station

The ZoneSafe wireless charging station provides a straight forward and reliable way to keep ZoneSafe proximity warning tags charged and ready for use.

Depending on their usage, ZoneSafe rechargeable tags offer up to 3 months of use before they need a charge. The wireless charging station provides both full and top-up charging capabilities ensuring tags are ready to use when you need them.

Each charging station will simultaneously charge up to 5 tags.

A full charge will take less than two hours. Each bay within the charging station will indicate if a tag is charging or charged via the bays LED.

The charging station is mains powered and supplied with a plug top power supply to make it easy to install and use.

Stand the charging station on a flat surface or wall mount in staff welfare facilities, offices and gatehouses. Wherever they are placed makes charging ZoneSafe tags straight forwards and easy.

- Reliable and easy tag charging
- Full and top-up charging
- Charge up to 5 tags per station
- LED charging indicator
- Mains powered
