## ACTIVATED WARNING & ZONE CONTROL

Physical segregation of workplace vehicles and pedestrian workers is the best and safest way to prevent collision accidents.

However, physical segregation is not always achievable due to site layout, pedestrian crossings and worksite operations.

ZoneSafe's activated visual warnings and zone control provide a site wide solution to reduce pedestrian and vehicle collision risks whilst increasing segregation.

### ACTIVATED WARNING & ZONE CONTROL SOLUTIONS

#### ACTIVATED WARNING LIGHTS

Flashing lights and warning beacons at crossing points, warn pedestrian workers of an approaching vehicle. Warning sirens are optional if required.

#### TRAFFIC LIGHTS

Let pedestrian workers know when it's safe to cross at roadways or exits through doors, gates and barriers into operational areas using traffic light solutions.

#### VEHICLE SPEED ZONE

Speed Zones control the speed of the vehicle in designated areas such as pedestrian crossings and vehicle doorways. Please note - speed restriction depends on the type of vehicle in operation.

#### ACTIVATED WARNING SIGNS

When vehicles are approaching, activated warning signs alert pedestrian workers to the vehicle at crossing points, blind corners and at the end of warehouse racking and aisles.

#### PROJECTED WARNING SYMBOLS

Warning signs are instantly projected onto the floor when a vehicle is approaching. This solution is most effective at blind corners or at the ends of storage racking to warn of approaching vehicles.

#### PEDESTRIAN ACCESS

Doors, swing gates and barriers automatically lock upon detection of an approaching vehicle. When the vehicle moves away, the door, gate or barrier will automatically unlock.

## Why Choose ZoneSafe?

Increase pedestrian awareness to approaching vehicles.

Only active when vehicles are in close proximity.

Site wide implementation.

System **does not** require proximity tags.

Improve safety through warning and segregation.

Create a **positive safety culture**, improving staff morale and productivity.

Enhance your company **safety standards** and reduce the likelihood of costly company fines.

# Activated **Warning** & Zone Control

Reduce the risk of pedestrian / vehicle collisions on your worksite.

Be confident in the safety of your workforce and site operations.
