ZoneSafe PROXIMITY WARNING & ALERT SYSTEMS

Vehicle to Pedestrian Alert
Quick-Fit Kit

The Vehicle-to-Pedestrian Alert Quick-Fit Kit fits any industrial vehicle. Quick-fit connections let you install the system in minutes, using either the supplied battery or by plugging it into a 12V socket inside the vehicle to power the system.

Once installed, the Vehicle-to-Pedestrian Alert system springs into action—spotting anyone near the vehicle who wears a tag. Each tag assigned to a pedestrian worker vibrates to alert them when a vehicle approaches, while drivers receive real-time alerts from their in-cab control unit, warning them of nearby pedestrian workers. By giving both pedestrians and drivers timely, clear warnings, the system dramatically reduces the risk of accidents between people and moving vehicles.

The complete system comes in a waterproof (1680D nylon) padded soft shell carry case with handles for easy carrying and plenty of pockets. The bag contains the following equipment:

- Antenna Unit with magnetic fixings to fix to the vehicle
- Control Unit with magnetic fixings to fix to the vehicle
- Driver tag (Pedestrian tags ordered separately)
- Tag Charging Pad
- Battery
- Quick Fix 12V Connectors
- All Quick Fix Cabling
- Purple 'System Working' Beacon (Optional)

For more information on each piece of equipment, please see the relevant data sheet.

Antenna

In-Cab Control Unit

Driver Tag

Purple Beacon

Battery or 12V Power

Tag Charger

General Specifications

Dimensions	550 x 410 X 230mm
Materials	Durable padded & waterproof nylon case suitable for use in an industrial environment (1680D Nylon).
Storage	Many pockets for storage both inside and outside of the bag with removable inserts.
Carrying	Adjustable shoulder strap, soft handle or luggage strap.
Weight	6kg
